NWEN 243 Lab 2 Topic Questions

David Barnett ID: 300313764

Question 1

The modified Caesar cipher from Lab 1 did not make it harder to crack using frequency analysis. Due to the algorithm is just just mapping a clear character to a cipher character, the frequency of the cipher characters can still be used to infer the clear character with frequency analysis.

Question 2

The main changes to my crack.c would
